

Purchasing Policy of the Gdańsk Tourist Organization (GOT)

Vision:

The Gdańsk Tourist Organization pursues its sustainable development goal by adopting a purchasing policy. Making responsible purchasing decisions promotes social and environmental responsibility among the organization's employees and contractors.

Our principles are based on three main points:

1. We only purchase essential items and services, eliminating excessive consumerism.
2. We prefer bulk purchases to minimize waste and packaging.
3. We have a designated person responsible for office purchases, enabling centralized control and transport optimization.

These steps form the basis of our purchasing policy, supporting our commitment to responsible resource management.

1. Groceries:

1. We prioritize choosing water in glass bottles to minimize plastic usage. We select suppliers who actively care for the environment and engage in the protection of water resources.
2. Our choice of coffee is based on suppliers with organic certifications and providing verified sourcing of materials. This way, we support the idea of fair trade and coffee growers operating following sustainable development principles.

2. Industrial, Chemical Products:

1. We use recycled paper, thus supporting recycling practices and waste reduction. We choose suppliers committed to environmental protection.
2. We opt for eco-friendly dishwashing liquids that are biodegradable and do not harm the environment, maintaining cleanliness in our office.

3. Other:

1. We prioritize suppliers promoting sustainable logistics practices to minimize transportation's impact on the natural environment.
2. We use biodegradable tissues aligned with our ecological and ethical values. We prefer suppliers offering vegan products and caring for animal welfare.
